DETAILED ACTION

Allowable Subject Matter

Claims 1-2 and 4-5 are allowed.

The following is an examiner's statement of reasons for allowance: regarding independent claims 1 and 4, Examiner agrees with Applicant's arguments. Regarding claims 1 and 4, the prior art fails to teach or fairly suggest, in addition to the accompanying features of the claims, first and second circuit boards where the first circuit board contains a switch circuit for generating a control signal according to an input signal; transmitting the control signal from a first node of the first circuit board to a second node of the second circuit board through a flexible cable; and connecting a pin of a first control chip located on the first circuit board to the first node and connecting pin of a second control chip located on the second circuit board to the second node so that the first and second control chips are controlled by the same control signal. Claims 2 and 5 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
